## Search Box Behaviour

Search

1

AND

OR

2

Any Fields

Full-text

Journals' Title

See tables 1 and 2 on the next page

## 1. Research Operators

<i>Operators</i>	<i>Valid Forms</i>	<i>Examples</i>
AND	AND	labor AND population
	&	labor & population
	+	labor + population +labor +population labor population
OR	OR	labor OR population
		labor    population
NOT	NOT	labor NOT population
	!	labor !population
	-	labor -population
Grouping	Parentheses ( )	taxes AND (labor OR population)
Exact wording or phrase	Quotation marks “ ”	“labor and population” “labor population”
Truncation	Asterisk *	populat*
Single-character wildcard	Question mark ?	popu?ation

Please note that the parentheses are mandatory when using more than one operator

## 2. Research Fields

<i>Field</i>	<i>Description</i>
All fields	Search within metadata and full-text.
All fields without full-text	Search within metadata, without the full-text.
Full-text	Search in full-text, without the meta data.
Title, Abstract*, Keywords*	Search in the titles, abstracts and keywords all at once.
Title	Search in articles, books and thesis chapters, documents and data titles and alternative titles.
Author	Retrieve the records of an author. If the results are not satisfactory with the full name of an author try the surname only, or the name and first initial.
Author Affiliation*	Search within the authors' affiliations (universities, research groups, etc.)
Journal Title	Search only among the titles of journals of the collections selected in the <i>Limitations</i> section of the search interface (which are by default Érudit and the Electronic Text Center at UNB Libraries).
Bibliography	Search within any component of the bibliography
Title reviewed	Search within the titles of the book reviews only, which include the title of the book, and the name of the author.

For best search results, make sure you are not using too search fields at once!

\* Please note that some documents might not have these fields as a search option.
