Material Culture

The Journal of the International Society
for Landscape, Place, & Material Culture

Now Accepting Manuscripts

The topics covered by *Material Culture* include all aspects of the study of material items from any world regional focus. These include: the role of products and commodities in the global economy, the cultural patterns that explain distribution and diffusion; exploration of cultural patterns in performing and visual arts; understanding tradition and innovation among individuals and the societies creating them; the meaning and importance of past and contemporary objects to their makers and users; attempts at restoring and maintaining folk and popular culture landscape elements; and the importance of understanding the relationships of material culture in the contemporary landscape. We welcome manuscripts from individuals interested in these subjects and encourage interested authors to discuss ideas with the Editor.
