MULTILINGUAL TECHNICAL DICTIONARY ON CD ROM

TERMDOK, the database created by the Swedish Centre for Technical Terminology (TNC), is now available on CD ROM. This contains about 25 000 single and multiword terms classified into various branches of science and technology, with corresponding terms and synonyms in English, French, German, Danish, Norwegian, Finnish, Russian and Spanish. On the whole there are 100 000 equivalences.

The material to TERMDOK, has been taken from about 25 different glossaries published by TNC, within a lot of areas. For example areas as energy, environment, planning and building, workshop engineering, data processing, geology and forestry.

TERMDOK on CD ROM is published by Walters Lexikon in Stockholm. It was produced by Archetype Systems Ltd., of London using the new multilingual CD ROM retrieval software from Dataware 2000 GmbH in Munich. This Software had rapidly achieved international recognition for its speed of retrieval, ease of use, and facility for tailoring the presentation with prompts and HELP messages appropriate to the language and level selected by the user.

TERMDOK can be of great value for many as technical writers, translators, educators, tutors and librarians. TERMDOK will be updated yearly.
