Select Bibliography of the NRC

The following bibliography offers a selection of monographs which pertain wholly, or in large part, to aspects of the history of the National Research Council of Canada. The periodical literature, and works which deal peripherally with the NRC, are too numerous to list here. Readers interested in various topics should consult the notes to the articles in this collection.

Primary Sources

Early activities of the NRC are reported in the *Report of the Administrative Chairman of the Honorary Advisory Council for Scientific and Industrial Research*; this is superseded by *Report of the President*. See, also, *Annual Report of the National Research Council*.

Scientific activities of the NRC were reported in detail by the *NRC Review* (1946-68).

A selection of files and personal papers of various divisions reside in the NRC archives; some have finding aids. Other material is held by Canada Institute for Scientific and Technical Information (CISTI) in Ottawa.

Marianne G. Ainley, ed., *Despite the Odds: Essays on Canadian Women and Science* (Montreal: Véhicule Press, 1989)
