DISEASE, FIRE AND WATER IN THE NINETEENTH CENTURY CITY:
A BIBLIOGRAPHY

John H. Taylor

Health is better served still, though the Canadian material is thin. Invaluable sources are the annual reports of the various city medical health officers, and the annual reports of the provincial boards of health found in the various sessional papers. These latter often contain synoptic articles on the development of public health. Recent scholarly articles include Margaret W. Andrews, "Epidemic and Public Health: Influenza in Vancouver, 1918-19," *BC Studies*, No. 34 (Summer 1977), pp. 21-44; and Geoffrey Bilson, "Canadian Doctors and the Cholera," Canadian Historical Association, *Historical Papers*, 1977, pp. 104-119; and Artibise, *Winnipeg: A Social History of Urban Growth*, Chapter 10.
