International Urban Bibliography: Recent Publications in Urban History

Bibliographie du monde urbain: Publications récentes en histoire urbain

Elizabeth Bloomfield

Preface/Préface

As part of its agreement in late 1985 with Urbanism Past and Present, the Urban History Review now publishes a bibliography of publications in international urban history in each June issue. The bibliography of Canadian urban history will continue to appear in each October issue of the Urban History Review.

The International Urban Bibliography is designed primarily for North American readers. Because of space limitations it must be selective, including books and major articles rather than purely local histories or case studies. In accordance with Canada’s official language policy, mainly English and French-language publications will be listed. References to publications in other languages should be highly significant statements, for which translated titles should also be provided.

The bibliography is organized first in a general part, subdivided into historiographical, economic, demographic/social, environmental/physical, and administrative sections. The larger Regional division has sections on each world region, subdivided by individual countries.

In compiling this first international listing, I thank publishers in the field of urbanism and urban history who sent advice of new books and also Dr. David Buck of Urbanism

Past and Present who provided some bibliographic references. I am also grateful to members of my family and to Peter McCaskell, of the Department of Geography, University of Guelph, for help in producing this listing in the short time available.

Bibliographic references for future international lists would be most welcome. I appreciate the willingness of several urbanists specializing in major world regions to serve as advisory contributors. In the future, items listed will usually be those published in the preceding calendar year. Bibliographic references, for inclusion in the June, 1987, issue are welcome from any readers of the Review, and should reach the Bibliography Editor by January 31, 1987.
