Jacques Gréber, Urbaniste et Architecte

David Gordon and Isabelle Gournay

Jacques Gréber (1882–1962) was born into an artistic family in Paris, and admitted in architecture at the École des Beaux Arts in 1901. He was a fine student, winning several prizes during the arduous training at the École. On his graduation in 1909, he missed the Rome Prize for architecture, which changed the direction of his career. Instead of spending years in Rome studying classical architecture, he left for the United States, where American architects who had trained at the École immediately engaged his talents to design jardins à la française for the large houses they built in New England.

Gréber quickly developed a reputation as a landscape architect and collaborated with Horace Trumbauer of Philadelphia on mansions in Newport, Rhode Island, and Elkins Park, Pennsylvania. Gréber’s work with Trumbauer helped him win his first major commissions in urban design, the 1917 Fairmount Parkway in Philadelphia (figure 1), a diagonal avenue cut through William Penn’s 1682 grid plan from the Art Museum to City Hall. While completing the parkway, Gréber was commissioned by the French government to make a systematic study of American construction practice. Characteristically, he expanded the study to include architecture, housing, landscape architecture, and urban design. It became his influential book L’Architecture aux États-Unis, which is the subject of Professor Isabelle Gournay’s paper in this issue.

Gréber returned to France in 1919. The book and his winning plan for the Paris fortifications secured his reputation as one of France’s leading urban designers. He was appointed to the faculty of the Institute of Urbanism in Paris, and took a leading role in the reconstruction and expansion of French cities between the wars. Gréber prepared plans for Lille (1923), Belfort (1925), Marseille (1930–7), Abbeville (1932), and Rouen (1940), among many others. He designed two Parisian garden suburbs, numerous gardens and parks, and helped plan the 1937 World’s Fair, which is the subject of Dr. Daniel Udovick-Selb’s paper. Gréber also maintained his North American connections as consultant to Philadelphia and to the 1939 New York World’s Fair, and lecturer at the Université de Montréal.

At this time, he prepared the plan for a Montreal garden suburb, which is the subject of Dr. Léon Ploegaert’s paper. As a landscape architect, Gréber designed formal gardens across Europe, won competitions for public parks, and designed six American war cemeteries in France, including those for Bellau Woods and the Argonne. During the 1920s, his architecture changed from his Beaux-Arts training, seen in the Rodin Museum (1926–9, with Paul Cret), to a classically proportioned Modern style, most notably in the École de plein air at Roubaix, 1926 (figure 2) and the Esso Building at La Défense (1962, with his son, Pierre Gréber). Gréber’s multi-disciplinary expertise was recognized by election as an officer of the Legion of Honour and presidency of the French societies for planning and landscape architecture during his career.

In the post–World War II period, Gréber’s most prominent commission was the plan for Canada’s capital (figure 3).

described by David Gordon's article. However, he also com-
pleted plans for the reconstruction of Rouen, Ville de Québec
(with Edouard Fiset), and the Montréal region, which is the
subject of José M'Bala's paper.

When Jacques Gréber died in 1962, La Vie Urbaine mourned
him as "le plus grand des urbanistes français." Yet within two
decades he was practically forgotten in France, despite his
prodigious output as an architect, planner, landscape architect,
and educator over a career spanning a half-century.8

We hope to do our part to revive some of that memory within
this special issue of the Urban History Review.9

Notes

2. David Brownlee, Building the City Beautiful (Philadelphia: University of
Vitruvius: An Architect's Handbook of Civic Art (New York: Architectural

d'expansion du génie Français, heureuse association d'attu-
labiennent complémentaires (Paris: Payot & cie, 1920). For the
book's European influence, see Jean-Louis Cohen, Scenes of the World
to Come: European Architecture and the American Challenge 1893–1960

4. There is no known archive of Gréber's papers. The most comprehensive
review of his work is André Lortie, Jacques Gréber (1882–1962) et
L'Urbanisme le temps et l'espace de la ville (Ph.D. thesis, Université
Paris XII, vol. 1–4, 1997). A 1936 résumé in the files of Canadian Prime
Minister Mackenzie King is also useful. See National Archives of Canada,
MG 26 J2, Vol 276, File O-303-1, "Mr. Jacques Gréber," dated October
27, 1936; and a promotional monograph for his consulting firm, Jacques
Gréber, Architecte SADG SC SFU Urbaniste et Architecte de Jardins
(Strasbourg: EDARI, n.d., est. 1935) held in the library of the National
Capital Commission, Ottawa.

5. See Brownlee, Building the City Beautiful, 77–81. Jacques Gréber
commissioned his father, noted sculptor Henri Gréber (1854–1941), to
execute the large marble copy of Rodin's The Kiss for the main gallery.
